Subject: RE: Potential clothi studies needing DERs from Amy
Attachments: Clothianidin Registrant-Open Lit Reviews Status 3-28-16.xlsx

Hi Michael,

See my notes in red below. Also see the “COD – reg” tab in the attached Excel file (this file is from 2016 and reflects some coordination efforts we had with PMRA on DERs. That is about the extent of my memory on that.) “No info” means I couldn’t find any clues about DERs for those studies.

I’m not sure how many DERs Amy is willing to do?

Thanks,
Monica

Subject: Potential clothi studies needing DERs from Amy

Hi Monica,

I’m thinking a subset of the studies below would be good to make sure we have final DERs. Would you mind looking into whether there are already final DERs for these? The aquatic ones are ones we identified as being relatively important (though I think we only used the Cavallaro *{definitely finalized}* and Lemna ones to calculate RQs). For the seed treatment ones, I think the idea is to do an open lit style review that encompasses all of them. If you want to talk any of these through or have questions, email me or give me a call at Personal Phone / Ex. 6

Thanks,

Michael

Aquatic Studies

MRID 49844001 63-D Midge Study – needs final DER, have contractor draft
MRID 49844002 63-D Midge study with TMG – needs final DER, have contractor draft
MRID 49281301 Lemna gibba (I can’t remember if I already did a DER for this?) – needs final DER, have contractor draft
MRID 47483004 – this is an aquatic mesocosm study with a contractor draft DER. Would this be useful for Amy to review / finalize since she largely did the aquatic assessment?

What about the passerine toxicity studies MRIDs 49104802 and -01 (-01 identified as invalid during the screen so we didn’t request a contractor DER, but I assume we still need to generate something to respond back to the registrant)?

Seed Treatment Residue Studies

Canola Tunnel Studies—a bunch of these should have DERs already

49073627 (no info); 49073626 (no info); 47699422-25 (no info); 45422432-33 (we had a N in the “To be reviewed” column, see attached); 45422436-37 (we had a N in the “To be reviewed” column, see attached); 45422431 (N in attached spreadsheet)

For MRIDs 454224 – 31, -32, -33, -36, and -37 I found contractor drafts in the folder: Z:\Contractor Draft DERs\Other Collections\Dynamac Fate DERs\Clothianidin

Corn Tunnel Studies

49073613 (no info), **49073616**-18 (based on the attached file, it looks like we intended to do a review but haven't yet)

Sunflower Tunnel Studies

49073620 (looks like we have a draft DER somewhere and need to incorporate comments, see spreadsheet attached) & 49073621 (no info)
